

Overview of AI-related topics in class

User: Hi again, can you let me know what we are going to learn in this class?

Chatbot: In this class, we will be learning about the general recipe for AI-related problems, focusing on data, models, objective functions, optimization, and more. We will also explore the importance of starting points in optimization, the concept of overfitting, and the role of optimization in machine learning. Additionally, we will discuss the evolution and revolution of AI and the significance of data in AI-driven models.
